

## **Careers and Training Information**

The Laserlight training courses provide a thorough breakdown of all these procedures required to create and maintain a safe environment during the use of surgical lasers. The training program will provide physicians, nurses, medical assistants, aestheticians, electrologists or other laser system operators with an introductory understanding of both theoretical and practical concepts.

Training and Instruction includes:

- Basic laser physics and laser tissue interaction
- Types of medical and hair removal lasers
- Laser parameters (wavelength, chromophore, pulse duration, repetition rate, spot size, energy setting) and their effect upon results.
- Photodynamic and flashlamp methods of hair removal
- Basic hair biology and growth cycles
- Skin typing, fluence selection, pre and post skincare
- Contraindications to treatment
- Laser safety issues for the patient and the operator
- Extensive hands-on practice on laser systems
- Regulatory issues and meeting state requirements
- Marketing your laser business for success
- Hands-on laser experience
- Course evaluation tests
